- Practical course of API REST Consumption
- REST API Consumption Professional Course
- ECMAScript 6+
- Arrays Manipulation in JavaScript Course
- Object Oriented Programming Course OOP

Node.js

- Node.js: Data base with MongoDB and WebSockets
- Node.js Basics

TECHNICAL EXPERIENCE

In addition to several projects involving shops and restaurants, particularly noteworthy examples include

Portfolio Website - andlego.github.io

- Created a beautiful responsive portfolio website using **React**, **JavaScript**, **Html** and **Css**

Restaurant Delivery Web-App

- full stack app using **Reactjs**, **Firebase**, **Framer motion**, **css**. This projects allows the user to add new items and to maintain all the things over the firestore cloud database

Real Time Chat App

- Used **Socket.io**, **Node.js** and **Express** to build a backend that supports the chat messages in real time.
- Used **React** to handle all the frontend.
- Deployed with **Heroku** and **Netlify**

Flip Card and Wordle Games

- Both games developed to improve on computational logic. And increase skills on **JavaScript**.

You can check more of my projects on my portfolio or github.
